EDUCATION

Northeastern University , Boston, USA	Jan 2023 - Apr 2025
Master of Science in Computer Science	GPA: 3.9 / 4.0
CHARUSAT University , Gujarat, India	Jun 2018 - May 2022
Bachelor of Technology in Computer Engineering	GPA: 3.8 / 4.0

TECHNICAL SKILLS

Languages & Databases:	Java, R, Python, JavaScript, PHP, SQL, MySQL, PostgreSQL, MongoDB, Firebase
Fundamental Concepts:	Data Structures and Algorithms, Design Patterns, OOP, Microservices, JDBC, JUnit
Frameworks:	Spring Boot, Spring Security, React, React Native, Vue.js, Node.js, Express.js, TypeScript
Miscellaneous:	CI/CD, Docker, Kafka, Jira, Git, Spring Tool Suite, Caching, Postman, OAuth

WORK EXPERIENCE

Vylero , Cambridge, MA	
Software Engineer Intern <i>React, Java, SQL</i>	Sep 2024 - Dec 2024
- Built responsive user interfaces in React for an AI-powered matching app, leveraging reusable components, efficient state management, and API integration to enhance user engagement and enable seamless interactions. - Engineered backend systems in core Java, building RESTful APIs to handle secure data flow, optimized SQL queries for faster data retrieval, and ensured seamless integration between frontend and backend for scalable solutions. - Leveraged multithreading in Java to handle high-volume requests concurrently, improving system efficiency by 30%, enhancing response times, and ensuring robust data validation and synchronization for real-time user operations.	
Northeastern University , Boston, MA	
Graduate Teaching Assistant <i>Programming with Data, Python, Spyder</i>	Apr 2022 - Nov 2022
- Collaborated with distinguished professors to develop interactive assignments on topics like Dictionaries, Pandas, NumPy, Machine Learning, and NLP, while also facilitating Economics and Biomedical lab sessions for 25 students each. - Guided a class of over 500 students in constructing and debugging solutions within the Programming with Data.	
Inficube Technolabs Private Limited , Gujarat, India	
Software Engineer <i>React Native, Java, MySQL</i>	Apr 2022 - Nov 2022
- Maintained cross-platform mobile applications with React Native, achieving a user base growth of 40% within six months. - Optimized application performance through the strategic use of Spring Transaction management and database tuning, enhancing the user experience and reducing server load. Also, implemented JWT Token authentication.	
Software Engineer Intern <i>React Native, JavaScript, Node.js</i>	Dec 2021 - Apr 2022
- Designed and executed visually appealing user interfaces with engaging animations and seamless navigation using React Native. - Integrated APIs to streamline data retrieval, also achieved a 30% reduction in UI loading time through optimization techniques. - Developed OAuth2.0 and OpenID connect Authorization functionality to implement secure flow of application using Node.js.	
Zenerva Software LLP , Gujarat, India	Jun 2021 - Aug 2021
Web Application Developer Intern <i>HTML, CSS, JavaScript, PHP</i>	
- Enhanced user interface of an existing website by updating and improving HTML, CSS, JavaScript and Bootstrap elements. - Implemented WebSocket, WebRTC and real-time chat functionalities, resulting in 20% increment in engagement. - Collaborated within an Agile development environment to ensure streamlined project management and iterative development.	

PROJECTS

Variya Association Application <i>Java, React Native, Spring Boot, MySQL, Postman</i>	Dec 2020 - Apr 2021
- Constructed a robust Cross-platform application in React Native for thriving community of over 5000 members, integrating features such as comprehensive community member profiles, event details, and an engaging photo gallery. - Architected a RESTful API using Spring Boot and Maven and implemented secure authentication with <2000ms response time.	
Image Manipulation & Enhancement <i>Java, Swing, Object-Oriented Design, JUnit</i>	Mar 2023 - Apr 2023
- Crafted a GUI-based image editor in JavaFX, accomplishing a blend of MVC architecture, design patterns, and adherence to SOLID principles. Assured stable performance by handling and resolving over 94% of error cases. - Tested the system leveraging Test Driven Development Methodology to ensure intended behavior with >80% test coverage.	
Financial Portfolio Tracker <i>MERN Stack</i>	Nov 2023 - Dec 2023
- Developed a scalable system using CQRS architecture and Gateway design, managing real-time data across 100+ assets via Tingo. - Empowered 4+ user roles using React, Redux, and MaterialUI by creating responsive and reusable UI codebases.	
FIX Protocol Trading System <i>Python, QuickFIX, Financial Data Integration</i>	Aug 2024 - Sep 2024
- Designed a trading simulation using FIX 4.2, enabling synchronous communication across client, broker, and exchange. - Built modular architecture with QuickFIX for order validation, session management, and streamlined execution reporting. - Established risk management and compliance mechanisms, optimizing latency and supporting high-frequency trade processing.
